New EnviroChemie subsidiary established in the Maghreb

With the new sales office, EnviroChemie has increased its presence for industrial customers in Morocco.

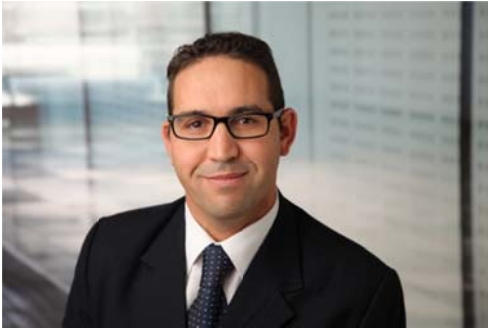

In mid February, the EnviroChemie Maghreb S.A.R.L subsidiary of EnviroChemie GmbH was established in Kenitra, Morocco. The Managing Directors of the subsidiary are Dr. Jörg Krause and Ahmed Rassam, who has already been looking after customers in the Maghreb countries for several years from the EnviroChemie head office in Rossdorf, Germany.

EnviroChemie offers customers in the Maghreb countries its entire product range for plant engineering, servicing and water chemicals for industrial water and wastewater treatment. Selected industries have already been supplied with high-quality technology "Made in Germany" for over ten years. Customers include major dairies, breweries, meat and fish processing businesses and disposal centres. The customer base includes local businesses as well as global corporations.

There is a particularly high demand in the Maghreb for plant solutions and services used for recycling water and resources. These include, for example, Biomar biological wastewater and sludge treatment plants, which are used to produce biogas and reduce disposal costs.
